

Seasonal Evaporation Climatology

Geographical
distribution of
specific humidity at
1000 hPa for (a) DJF
and (b) JJA. Units
are $10^{-3} \text{ kg}_{\text{H}_2\text{O}}/\text{kg}_{\text{air}}$.

Note error in book: The specific
humidity distribution shown in the
book (Fig. 2.31) is for 1000 hPa, not
900 hPa as in the figure caption.
Differences between this color figure
and the figure in the book are due to
updates in the data set, but they are
not significant differences.
